compositae in natal *Cineraria* occurs in 5 of the 12 associations/groups of Asteraceae in KwaZulu-Natal recognised by Hilliard (1978). *C. glandulosa* and *C. dryogeton* both appear to fall into Group 3, viz. KwaZulu-Natal endemics not confined to the Drakensberg, and some in the "Table Mountain Sandstone" outcrops and gorges, as they were previously known.

Two new species of Cineraria (Senecioneae, Asteraceae

compositae in natal Whilst working on the Flora Zambesiaca account of *Calostephane* Benth. (Compositae: Inuleae), on the two species present in the Flora area, it became obvious that a reappraisal of the taxa in the genus was needed. *Calostephane* was

monotypic when described with a descriptio generico-specifica and included *C. divaricata* Benth. (Bentham 1872).

A synopsis of *Calostephane* (Compositae: Inuleae
